ALAN GREENBERGER

Executive Director of the Philadelphia City Planning Commission

Alan Greenberger is the Executive Director of the Philadelphia City Planning Commission and chairs the Philadelphia Zoning Code Commission. His current work at the Planning Commission and with UPenn City Planning graduate students is focused on outlining long-term growth strategy for Philadelphia titled 'Planning for the Post-Industrial City.' Growth strategy issues such as now-fallow land use, connections between communities and a city's natural resources, and understanding current and future economic drivers are applicable to smaller formerly industrial cities such as those throughout the East and Midwest.

Prior to his 2008 appointment to the Planning Commission Greenberger was partner of Mitchell/Giurgola Architects and lead designer for a variety of projects, such as the America on Wheels Museum, Mann Center for the Performing Arts Master Plan and Pavilions and the Centennial District Master Plan. He also co-founded and chaired the Design Advocacy Group of Philadelphia, a volunteer organization made up of architects, city planners and developers which works toward planning reform in Philadelphia.

Greenberger, a Rensselaer Polytechnic Institute School of Architecture alumnus, is also a faculty member of the Department of Architecture at Drexel University and the Department of City and Regional Planning at the University of Pennsylvania.

Gleason Corporation operates within one business segment. The principal activity is the design, manufacture and sale of machinery and equipment for the production of bevel and cylindrical gears. The Company manufactures a complete line of machines and tooling for bevel gears. Bevel gears transmit power at an angle, such as from the drive shaft to the rear-axle of a vehicle. The Company also manufactures machines and tooling for producing cylindrical gears.

Cylindrical gears transmit power in a straight line and have a variety of application, including transmissions of front wheel-drive vehicles. The Company's major customers are in the automotive and truck industries, which normally account for three-fourths of its total sales each year. Other industries served include aerospace, construction, farm and marine. The Company's markets are worldwide: historically two-thirds of total sales each year have been to customers located outside of the United States. Gleason Corporation operates manufacturing plants in China, England, Germany, India, Switzerland, United States, as well as affiliates in Japan, with sales and service offices throughout the world. James S. Gleason, grandson of Andrew C. Gleason, is Chairman of Gleason Corporation.
